New Product Release!

Order by May 31st**Make your chassis race ready!****All new high speed pulley set for GALM**

Introducing all new high speed pulley set for GALM. Make your chassis faster by simply exchanging the original parts to this set of 33T diff pulley and a special drive belt. Instead of the original $39T/12T=3.25$, applying $33T/12T=2.75$ transmission gear ratio hugely improves mid to high speed accelerations without interrupting the low speed acceleration control. Eliminates the unnecessary speed reduction, making faster cornering possible. Adjustments of the gear ratio can be done after testing with your own pinion or spur gears.

●OD2490 High Speed Pulley Set (For GALM) 1,800 JPY

**overdose****Will be shipped in ealy Aug. 2018**
