## New Product Release!

Order by July 6th

A new adjustable feature!

### Adjustable Aluminum Rear Suspension Arm Type-2 !!

Introducing brand new adjustable aluminum rear suspension arm type-2. On top of the original adjustable features of the arm length, you can now make the arm shorter than the standard (adjustable by 1mm pitch to standard +2 - 6mm). The trailing angle can also be adjusted to three different degrees of 0, 3, and 6 ° . Elimination of the shock adjust block made radial mount possible. This allows fine adjustments of the shock mounting positions to for better traction, better for high cambers, and increases adjustment range of wheel bases. Available in purple, red and black. OD2480, OD2481, OD2482 Adjustable Aluminum Suspension Mount Type-2 need to be installed in the rear front when the trailing angle is in 3° or 6° .

●OD2495 ~ 97 Adjustable Aluminum Rear Suspension Arm Type-2 (For OD) 20,000 JPY
