# New Product Release!

**Order by Jan 19****Optional parts for GALM users!**

## Aluminum steering slide rack set with adjustment systems!

The aluminum steering slide rack set for GALM. Added an adjustment function to the ball bearing to hold the rack to reduce the looseness. This also makes the clearance adjustments easier while the rack is on board. Ensures the positioning of the ball bearing. The rack is hard coat anodized, improving its wear resistance. Having the 4-ball end mount provides wider range of ackerman adjustments. Comes with a 4mm long ball stud to increase the steering angles. Available only in black.

●OD2397 Aluminum Slide-Rack Steering Set (For GALM/Black) 16,000 JPY 

**Will be shipped in early April. 2018**
