## New Product Release!

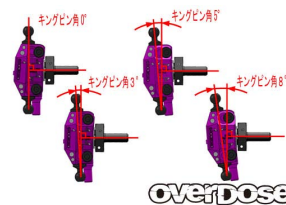

Order by Mar 16

### Adjustable features to the kingpin angles & knuckle stoppers!! All new Adjustable Aluminum Knuckle Type-2!!

Introducing all new Adjustable Aluminum Knuckle Type-2. The fixed type kingpin angle of the previous model has been changed to the 4-level adjustable structure. Also, added adjustable features to the knuckle stoppers. Redesign of the shapes and mechanics of each part increased the range of set ups as well as the usability. Color options are purple, red and black.

- 4-level adjustment of the kingpin angle (0, 3, 5, 8° )
- Added adjustable features to knuckle stoppers. Avoids over angles and wheel interference.
- 10 patterns of tie rod mounting positions (3 levels outwards and 6 levels inward) for various ackerman settings
- includes 2mm long axle shafts
- Includes  $\phi 2.6$  spacer for trail adjustment
- A new body designed for sharper turns and less interference of the tie rod

●OD2437 Adjustable Aluminum knuckle Set Type-2(For RWD) each color 18,000 JPY

### $\phi 2.6$ mm spacer set is also available for knuckle trail adjustment.

A must-have spacer set to go with adjustable aluminum knuckle Type-2. Comes with 4 different thicknesses: 0.5, 1.0, 2.0, 3.0. Can be used in the rear upright areas to adjust the wheel bases.

●OD2494  $\phi 2.6$  Aluminum Spacer Set (0.5, 1.0, 2.0, 3.0/Black/4 pcs each) 1,500 JPY
